-----

Head east on the dirt trail, staying left to stay on main trail. You will pass horses to the left, a wood bridge on the right, and another horse on the left.

After crossing the large black stripe, count 99 steps from the white gate to a metal circle. Then count 100 more steps to the next circle. Finally 55 more to a fallen log on the right. Look under the Northeast edge.

Hike Length: 2.43 miles
